Haire-Joshu, Debra, PHD

Active

U48/DP000060-02 (Brownson, Ross C., P.I.)

9/30/04 – 9/29/09

HHS/CDC

Health Promotion and Disease Prevention Research Center

The major goals of this project are to develop chronic disease prevention interventions that are appropriate for high-risk areas.

1 P50 CA95815-1A1 (Kreuter, MW, P.I.)

9/1/03 – 8/31/08

NIH/NCI

Centers of Excellence in Cancer Communication Research

This center seeks to enhance the effectiveness of cancer communication among African Americans. This research will identify strategies for integrating cancer communication within the cultural norms, values, and beliefs of various groups of African Americans, evaluate the effects of these strategies, and explain the mechanisms through which they influence cancer-related beliefs and practices.

U48 DP000060-02 SIP 12-05 (Brownson, Ross C., P.I.)

09/30/05 – 09/29/08

CDC

Applying Evidence-Based Physical Activity Recommendations in Brazil

The overall goal of this project is to adapt evidence-based strategies for promoting physical activity for use in Brazil.

USPHS 1R25CA1026801 (Kreuter, MW, P.I.)

09/01/03-08/31/08

NCI

Minority Pre-doctoral Education to Reduce Disparities

This program seeks to eliminate cancer disparities by preparing African American pre-doctoral students in public health become cancer prevention and control researchers. A multifaceted education program will be designed to provide these students with didactic instruction, mentored learning, mentored independent research and professional network-building with research role models.

1K08HS013901 (Barlow, Sarah, P.I.)

09/01/03-08/31/08

AHRQ

Improving Obesity Care in Pediatric Offices

Mentored Clinical Scientist Development application to improve communication about childhood and adolescent obesity in the offices of pediatricians.

US48-DP-000060 SIP 16-04 (Kreuter, MW, P.I.)

9/30/04-9/29/09

CDC

Prevention Research Centers' Cancer Prevention and Control Research Network

The Saint Louis University PRC will expand the capacity of the Cancer Prevention and Control Research Network with an innovative and ambitious plan to create a regional network of community partners who will participate in cancer prevention and control research among African American populations

1R01CA121534-01 (Haire-Joshu, Debra, P.I.)

9/30/05 – 7/31/10

NIDDK

Achieving Energy Balance in Overweight Post-partum Teens

This project is a multilevel intervention designed to reduce overweight in postpartum teens as measured by a change in body mass index.

5P60 DK020579-29 (Haire-Joshu, Debra, Co-PI)

12/1/05 – 11/30/07

NIDDK Core

Diabetes Research and Training Center

The objectives of the Diabetes Research and Training Center's Prevention & Control Research Program are to facilitate research in phase. 1 (e.g., bench to bedside) and phase 2 (e.g., clinical research to community practice) of diabetes translation research.

Mystics Foundation

7/1/06-6/30/07

(Haire-Joshu, Debra, Co-PI)

Mystics in Training (MIT), a program which addresses the aforementioned barriers by providing a systematic approach which will create and support school environments in which children can practice healthy eating and physical activity behaviors. MIT will be piloted with children attending schools in Washington DC, Virginia, and Maryland; results of this program will be used to guide implementation of a nationwide program designed to prevent childhood obesity throughout the schools.
